EDUCATION

University of Lille

Master of Science in Computer Science
Magna cum laude

Sep 2019 – Sep 2021

Lille, France

University of Lille

Bachelor of Science in Computer Science
Cum laude

Sep 2016 – Jun 2019

Lille, France

SKILLS

Languages: HTML, CSS, JS, PHP, SQL, GraphQL, C#, Java

Developer Tools: VS Code, Eclipse, Git

Technologies/Frameworks: React, Next.js, Node.js, MySQL, Unity

Soft: Adaptability, Communication, Problem-solving, Creativity, Attention to detail

EXPERIENCE

Hologame

Lead Developer

Sep 2018 – Oct 2021

Tourcoing, France

Co-founded hologame while studying computer science at the University of Lille, hologame designs and sells a turnkey free-roam virtual reality arena concept to location-based-entertainment.

- Built the free-roam multiplayer VR shooter for standalone VR headsets using Unity / C#
 - * Optimized to run smoothly with up to 8 players and 40+ NPCs simultaneously
 - * Playable on a physical area of 300+ m² and a virtual area of 1+ km²
- Developed the authentication web application for end users with React and CodeIgniter (PHP)
- Conceived the management application in .NET/C# used by our customers to launch and monitor the game sessions
 - * Allows end-user authentication on tablets without operator intervention, reducing game preparation time
 - * Reduces logistical burden by automating player-headset association and tracking the setup state of each player
- Created an internal web application to analyze business and operational data with Next.js and MySQL
- Implemented a REST API in PHP to enable communication between elements of the solution
- Met with entertainment entrepreneurs to give technical demonstrations of the solution in order to sell it
